PROJECTS

Portfolio

johanamartinez.com

- Created a minimalist and intuitive multi-page website to display my projects by using **HTML**, **CSS**, **JavaScript** and **React.js**.
- Utilized **React** to implement an image slideshow for each project for website visitors to better understand the functionality of each project.
- Tracked tasks with **Trello** and successfully deployed using **Netlify**.

Clothing Store

johanamartinez.com/#/store

- Developed an online store web application containing a landing, login, register, and individual product pages with **HTML**, **CSS**, **JavaScript** and **React.js**.
- Retrieved product information from the **Fake Store API** by performing a **GET** request for women's, men's and jewelry categories for users to easily browse products and individual product pricing, descriptions and sizing.

Boba Tracker

johanamartinez.com/#/boba

- Led a five-person team using **Scrum** methodology to build a full stack web application where users can track weekly milk tea purchases and minimize spending.
- Prototyped and redesigned the UI using **Figma** to create a more fun and visually colorful experience for users.
- Built an entry form with **HTML**, **Tailwind CSS**, **JavaScript**, and **React.js** where users can save drinks to an existing database by performing a **POST** request.

WORK EXPERIENCE

Optical Illusions

Optician

JULY 2022 - PRESENT

- Assisted an average of ten clients daily with choosing eyeglass frames compatible with their prescription, style, and personal needs to ensure long-term customer satisfaction.

EyeC Optometry

Optician

JUNE 2021 - JUNE 2022

Ophthalmic Technician

OCT 2014 - AUGUST 2018

- Simultaneously trained four new employees at a newly opened optometric practice in product knowledge and effective order processing, thereby increasing revenue.
- Supported two doctors by pre-testing 10-15 patients daily and obtained their medical history to help drive efficiency and maintain patient flow.
