PROJECTS

Portfolio

johanamartinez.com

- Created a minimalist and intuitive multi-page website to display my projects by using **HTML, CSS, JavaScript** and **React.js**.
- Utilized **React** to implement an image slideshow for each project for website visitors to better understand the functionality of each project.
- Tracked tasks with **Trello** and successfully deployed using **Netlify**.

Clothing Store

johanamartinez.com/#/store

- Developed an online store web application containing a landing, login, register, and individual product pages with **HTML, CSS, JavaScript** and **React.js**.
- Retrieved product information from the **Fake Store API** through a **GET** request on women's, men's and jewelry categories, for users to easily browse products and view individual product pricing, descriptions and sizing.

Boba Tracker

johanamartinez.com/#/boba

- Led a five-person team using **Scrum** methodology to build a full stack web application where users can track weekly milk tea purchases and minimize spending.
- Prototyped and redesigned the UI using **Figma**, to create a more fun and visually colorful experience for users.
- Built an entry form with **HTML, Tailwind CSS, JavaScript**, and **React.js** where users can save drinks to an existing database by performing a **POST** request.

WORK EXPERIENCE

Channel Code

Front End Developer

APRIL 2023 - PRESENT

- Launched user-friendly, responsive and visually appealing websites for clients, leveraging **HTML, CSS, SCSS, JavaScript** and **React.js** to proficiently convey valuable information to potential customers.
- Conducted productive client meetings to better understand their business goals, while ensuring timely communication, progress updates and adherence to project timelines.

Optical Illusions

Optician

OCTOBER 2022 - PRESENT

- Assisted an average of ten clients daily with choosing eyeglass frames compatible with their prescription, style, and personal needs to ensure long-term customer satisfaction.
